

Managed Security Solutions for SME Customers

Increase SME Connects with Managed Security Solutions

Want to increase sales and differentiate your services from competitors? Take the leg-work out of understanding potential IT security threats, regulatory requirements and available solutions for small and medium businesses.

Security attacks can cripple a small business enterprise (SME) in an instant. With new threats born daily, SME owners don't have the time to evaluate the latest technologies or the budget to deploy and monitor the security of their networks — 24x7x365. As a trusted resource for Internet connectivity, MSOs are well-positioned to address this security need with SMEs. Managed Security Solutions (MSS) offer new opportunities to connect small and medium businesses and can be easily integrated into your cable data modem services portfolio with the right partner.

INOC's Managed Security Solution enables MSOs to provide two simple options that fit SME business needs:

Managed Security Feature	Business Basic	Business Premier
Firewall	✓	✓
VPN: Site-to-Site	✓	✓
VPN: End-User		✓
Intrusion Detection & Prevention (IDS & IPS)	✓	✓
Antivirus (Gateway)	✓	✓
Spam Filtering (Gateway)		✓
Web Content Filtering (URL Filtering)		✓
Security Device Hardware/Software Maintenance	✓	✓
24x7 NOC Monitoring & Support	✓	✓
Security Web Portal	✓	✓

Secure Your Competitive Advantage with the Right MSS Partner

INOC, a global provider of 24x7 Network Operations Center (NOC) monitoring and reporting solutions, can help you demystify the complexity of IT security protection for your cable data modem business customers.

INOC's Managed Security solution is an easily deployed, affordable service that gives protection against multiple security threats:

- External and internal attacks on business applications
- Blended threats that infect hosts and self-propagate
- Spam messages with dangerous attachments
- Inappropriate Internet usage that exposes businesses to liability, jeopardizes IT security and consumes valuable bandwidth

For more information on how INOC can help your company improve Network and IT availability and performance, send an email to info@inoc.com or call **1-877-NOC-24X7 (1-877-662-2497)**. You can also find additional information on our website at www.inoc.com.
